

In order to manage Learner devices, LeadMe Edu will request special permissions upon first time login on a device.

First, LeadMe Edu will request location access. Tap **While Using the App** or **Allow** to continue. Please ensure you leave 'Precise' location selected.

Connecting as a •Leader for the first time

- Tap **Quick Login**:
 - If you haven't signed up before, tap **Sign up for account** and follow the prompts to create your new account.
 - If you've already signed up, just type in your login details and tap **Enter** to continue.

Connecting as a •Learner for the first time

- To login on the •Learner device, first make sure a separate device is already logged in as a •Leader, and that both devices are connected to the internet.
- Open LeadMe Edu on the student device, then select the •Learner tab.
- Enter the **four digit room code** displayed on the •Leader device, then tap **Connect**.
- Enter a nickname, then tap **Connect**.
- Follow the steps below to enable all the required permissions.

Step 01: Usage Information

- Tap the **Device Settings** button to open the 'Usage access' settings (open this manually by searching for 'usage access' in your device's settings, tap it, then find 'Usage access' in the list and tap again)
- Tap **LeadMe Edu** in the list, then toggle 'Permit usage access' ON by tapping the switch.
- A confirmation window will appear. Tap the **circle checkbox** to acknowledge the information provided, then tap **OK**.
- Tap the **back arrow** twice to return to LeadMe Edu and proceed to the next step.

Step 02: App Overlay

- After returning to the LeadMe app, tap **Device Settings** to open the 'App overlay' settings (or search for 'Display Over Other Apps' in your device's settings and select 'LeadMe Edu')
- Tap **LeadMe Edu** in the list, then toggle 'Allow display over other apps' ON by tapping the switch.
- Tap the **back arrow** to return to LeadMe Edu.
